REPORT
OF THE
COMMITTEE OF VISITORS
OF THE
County Lunatic Asylum at Prestwich,
TO THE
ADJOURNED ANNUAL SESSION HELD DECEMBER 31st, 1863.

*To Her Majesty's Justices of the Peace for the County of Lancaster,
in Annual General Session assembled 31st December, 1863.*

Prestwich, 30th December, 1863.

The Committee of Visitors of the County Lunatic Asylum at Prestwich present their report to the Annual General Session, in accordance with the provisions of the Act 16th and 17th Vict., cap. 97, sec. 62.

The enlargement of the Asylum during the past year has necessitated extensive alterations in the former buildings.

On the Male side new and well-ventilated Dining Rooms, with a Waiting Room and Lavatories, have been formed from the Workshops and Associated Bed Rooms; and a commodious Dead House has been erected in a position which will enable it to be secluded by trees from the rest of the Buildings.

On the Female side the Wash-houses have been converted into large and convenient Dining Rooms, with a Waiting Room corresponding with that on the Male side. A new Cooking House has been constructed, and alterations have been made to secure additional rooms for a second Assistant-Surgeon.

The New Buildings are nearly complete, and a handsome Corridor has been formed between the Male and Female sides.

The New Wash-houses are in full and satisfactory operation.

The fittings and furniture for the New Buildings and Laundry are either made or in process of making.

Additions to the Gas Works have been made under the superintendence of a Gas Engineer.

All applicants are now admitted. Great efforts were made to meet the extreme pressure of the various Unions, and to receive Patients before the rooms were completely finished for their reception.

The Asylum is capable of accommodating 498 Male and 502 Female Patients—Total, 1,000. On this day there are 375 Males and 432 Females on the books of the Establishment.

During the year 182 Males and 233 Females have been

admitted ; 29 Males and 31 Females have been discharged, of whom 26 Males and 26 Females were cured, and 27 Males and 25 Females have died.

The general health of the Patients has been good, but amongst the recent admissions there are large numbers of chronic cases, epileptics, idiots, and aged and infirm men and women.

There has been no change amongst the superior officers of the Establishment. An additional Assistant-Surgeon, an additional Assistant-Matron, and several additional Attendants, have been appointed, in consequence of the rapidly increasing number of Patients.

Plans for the enlargement of the Church, at an estimated cost of £1,200, the sum already granted by the Court, have been submitted to, and are now under the consideration of the Secretary of State and Commissioners in Lunacy.

The weekly charge for the maintenance of Patients belonging to Unions or Townships within the County has been 7s. 7d. throughout the year ; that for the maintenance of Patients belonging to Unions or Townships not within the County, and which consequently did not contribute to the original cost of erecting the Asylum, 14s.

THOS. S. MILLS,

Chairman.

REPORT

OF THE

SUPERINTENDENT.

Prestwich Asylum,

February 19th, 1864.

GENTLEMEN,

I have the honour to submit the Thirteenth Annual Report of the Prestwich Asylum.

On the 1st of January, 1863, the Asylum contained 504 Patients, of whom 249 were Men, and 255 Women. The admissions during the year amounted to 420; the total number under care and treatment 924. Of these—

52 have been discharged, recovered.

1	ditto	relieved.
---	-------	-----------

7	ditto	unimproved.
---	-------	-------------

54 have died.

The small number of recoveries as compared with the admissions is to be explained by the fact that a great many patients were transferred from Haydock Lodge and Union

Workhouses during the latter three or four months of the year, after the new ward for the Females was opened. In like manner is to be accounted for the small mortality; the per centage of deaths upon the number under treatment amounting to no more than 5·8.

The two New Buildings which have been lately erected for the accommodation of 564 patients of both sexes are completed and furnished, and are already occupied by about 400 of the better class.

They are situated on high ground behind the original Asylum, and are connected with it by long corridors, on either side of which are single bed rooms.

The blocks consist of three storeys—the lower one (nearly 15 feet in height) being divided on both sides into five Day Rooms, two of which are 60 by 36 feet in size.

Behind and attached to each block is a building fitted up with lavatories, bath rooms, dressing room, and water-closets.

The upper storeys are appropriated entirely as bed rooms; the lobbies, which are warmed by open fires, being completely furnished as dressing rooms, and with an abundant supply of wash basins.

The numerous and handsome day rooms form an admirable substitute for a new Recreation Hall, which, but for the ample

accommodation afforded by the former, would have been required, our present one being now much too small for the increased number of inmates.

Both sexes meet here fortnightly, when one of the large day rooms (containing in fact a larger area than the old Recreation Hall) is used for dancing, a small room for the band being attached. The other rooms, meanwhile, are occupied by those who prefer the quieter amusements of bagatelle, cards, dominoes, and draughts, thus obviating the necessity of crowding amongst the dancers those who are mere spectators, whilst the latter, on their part, are more congenially engaged elsewhere.

There being a corridor between these rooms, and a similar suite on the Men's side, this accommodation can at any time be doubled, should the occasion arise.

Our old Recreation Hall is still used once a fortnight, alternately with the New Building, when the more excitable patients are present, and it will still be retained for theatrical representations, exhibitions of the magic lantern, and concerts.

This room has also been daily used since the opening of the Asylum for Morning Prayers, when 200 of the inmates have been generally present; but now that the patients are so augmented in numbers the Chaplain has a second service in one of the large rooms in the Women's New Building for those who from want of room have not attended the first.

The Chaplain has likewise for some time past devoted two evenings in the week to reading short, amusing, and instructive tales to about 150 of the Female patients, and this appears to have given general satisfaction.

Two Dining Halls, each capable of seating 400 patients, have been constructed in the old part of the Asylum. They are conveniently placed near the kitchen, and are very central to those wards to which they belong. Here 800 of the patients (400 of each sex) will take all their meals.

These halls, which are spacious and lofty, have been formed on the Women's side out of the old laundry, and on the Men's side in a corresponding building which was originally erected for workshops.

The new detached laundry, which has been fitted up with Washing Machines and Hydro-Extractors, worked by steam power, answers very well, and relieves a great many of the inmates from their former disagreeable and injurious occupation.

The Church is now in course of enlargement, and will, when completed, give sittings for between 700 and 800 people.

A large piece of land, contiguous to the Women's new ward, is being enclosed and laid out as a pleasure ground.

A quadrangle of upwards of an acre in extent, and surrounded

by the old and new buildings and their connecting corridors, is also being levelled for the amusement of the patients on a Summer's evening; a Bowling Green, Croquet Ground, and Dancing Lawn, being formed for the purpose.

The Asylum can now conveniently receive 1,000 patients—500 of each sex—and the accommodation as to room is as follows :—

In the Day and Dining Rooms throughout the Establishment the space allotted to each patient on the Male side averages 40 superficial and 550 cubical feet; whilst on the Women's side it amounts to 44 superficial and 600 cubical feet. In the associated sleeping rooms the patients of both sexes have each a space of 49 superficial and 576 cubical feet.

The requisite means for personal cleanliness are abundant, there being distributed over the Asylum 34 baths and 400 wash basins, which are supplied with an unlimited quantity of water.

Our two bands, which were formed upwards of twelve years since, have increased both in numbers and efficiency. One, a stringed band consisting of 16 musicians, is of great service at our weekly assemblies. The other, which is a mixture of reed and brass instruments, and numbers 40 performers, is played for a couple of hours twice a week, and affords to those officers and attendants who compose it an agreeable recreation after the duties of the day are over.

In deference to an urgent communication from the Commissioners in Lunacy, and the well-known want of accommodation in the County for even recent cases of insanity, the New Building on the Female side was opened three or four months before some necessary and important alterations were made in the older part of the Institution. At the same time a large ward, containing about 80 Female patients, was given up for the temporary use of an additional number of men, and it was thought that by this arrangement an extra, *but limited*, number of patients of both sexes might be admitted. It was therefore determined to remove gradually to this Asylum those patients confined in Haydock Lodge, and to receive any *recent cases* that might arise.

Unfortunately a great many others were at the same time sent from various Workhouses, and the result was a much greater addition to our numbers than we were then prepared to accommodate. Added to this we were very deficient in Attendants for their proper supervision.

Although the Women's New Building was available during the evening and night, it was not so, for many reasons, during the day; the extreme difficulty, at meal times, of passing to and fro between the old and new buildings, and the presence of the workpeople in the latter (remedying defects and otherwise completing the work) being no small hindrances to its occupation in the day.

All the living rooms in the old building were therefore sadly

overcrowded, and the Recreation Hall was, in consequence, converted for the time being into a *Day* and *Dining* as well as *Work* Room.

Such was the unusual condition of the Asylum when visited in October last by the Commissioners in Lunacy, and this will account for the temporary occupation of the Recreation Hall by other patients besides those employed in needlework, as commented upon by the Commissioners in their report.

As soon as circumstances permitted, the suggestion of the Commissioners—"That the patients occupying the new ward should be allowed to work in their own spacious Day Rooms"—was carried out. Indeed, it was a part of the original scheme, as shown upon the plans, that one of the large rooms in the New Building should be used for that purpose.

It may not be out of place here to allude to the manner in which those officers and attendants, under whose immediate care the patients are placed, performed their trying duties during this period of unavoidable inconvenience and excitement. I cannot, indeed, speak too highly in praise of the patience and endurance they severally displayed under such an extraordinary pressure.

For some months the patients much exceeded the usual proportion of attendants, and this, coupled with the incompleteness of the wards, increased in a great degree the labours and anxieties of the latter.

Before closing this report I would respectfully call your attention to the present unsatisfactory state of Nos. 2 and 3 wards on both sides of the Asylum, which, owing to the great influx of patients of dirty habits, are now in a very offensive condition.

The water-closets and bath-rooms are so close to the living-rooms that the latter are never free from unpleasant smells, and to remedy this disagreeable state of affairs I would suggest that those necessary appurtenances be removed to a convenient place outside, but accessible to, the wards ; in fact, to the same relative positions occupied by those in connection with the New Buildings. This can easily be accomplished, and I have taken the liberty of procuring from the Clerk of the Works, and submitting to you, a plan for this very desirable alteration.

The Commissioners in Lunacy, at their last visit, left their usual report, of which the following is a copy :—

“ Prestwich County Asylum,

“ 21st October, 1863.

“ Since our last visit, a year ago, 108 Male and 119 Female patients have been admitted ; 30 Males and 28 Females have been discharged, and 23 Males and 16 Females have died. Of the patients who were discharged 48 are reported to have been recovered. The mortality seems to have been considerably below the average, but inquests were held in two cases. In one instance the patient was accidentally drowned ; the other committed

suicide by hanging. We are glad to find that the water tank, in which the patient was drowned, is partially filled up, and will soon be entirely removed.

“The general health is very good, and only six patients of each sex are under medical treatment.

“A Register is kept of the patients who are regularly and usefully employed, from which it appears that on an average 190 Men and 220 Women are daily occupied in various ways. All the shoes, clothes, and much of the furniture is made on the premises, and a large number of the men work on the land. The estate lately purchased by the Committee of Visitors has not yet been given up to them, but this will, we hear, shortly be done.

“The patients were generally quiet, but four Men and two Women were in seclusion. One Woman who was secluded is, we find, very frequently locked up on account of her destructive propensities. This case seems to be somewhat similar to the one specially noticed at our last visit. As the removal of that patient to another Asylum was attended with success, we recommend that this woman should also be sent to Rainhill, and we take this opportunity of suggesting that in all similar cases where patients become unmanageable their exchange should be promoted.

“No. 4 Ward, which contains 35 very troublesome Female patients should, we think, have a permanent staff of three nurses.

“The Women patients were particularly well dressed, and clean in their persons. The Men’s clothing struck us as not being in such a good state, nor of such good quality.

“We found the wards clean and well ventilated; the bedding also was clean. Many of the patients, however, sleep upon canvass stretchers without any mattrass, and in some cases the canvass was so loose as to rest upon the cross-bar below. These beds should be attended to, and we suggest that in future mattrasses should be used on all the beds.

“In consequence of the erection of the new wards considerable alterations have been made in the old buildings. A number of bed-rooms on the ground floor of the Male side are converted into a large dining-room; and a similar room for Women has been formed out of the old laundry. By these changes accommodation for dining 280 patients of each sex will be provided.

“The New Building for Women is now finished, furnished, and partially occupied, and the corresponding wards for Men will be ready for the reception of patients before Christmas.

“The additional accommodation afforded by these buildings will be about 280 beds for each sex, and when completed the Asylum will be capable of receiving nearly 1,000 patients.

“The new wards are very spacious, well lighted, and cheerful. They contain an abundant provision of baths, lavatories, and

water-closets, and they are plastered internally, and very handsomely finished and coloured.

“ The furniture in all the rooms is very good and comfortable. The bedsteads are of wood and very neat, and there is an abundance of excellent bedding.

“ The sitting-rooms and corridors are carpeted, and contain an abundance of tables and chairs. There are curtains to the windows, and statuettes, &c., are placed around the walls. So far as we can ascertain, the cost of this very superior accommodation has been as follows:—The building, including various alterations in the old Asylum and airing courts, &c., £41 per head; furniture and clothing, £13 per head.

“ A new dead-house has been built, and plans have been prepared for the enlargement of the Chapel, whereby 360 additional seats will be provided. This change will be effected without interfering with the performance of Divine Service. The Church is quite filled on Sundays by the attendance of 150 patients of each sex. At the daily prayers in the Hall 95 Men and 125 Women are generally present.

“ The Hall is used as a work room for Women during the day, and we found it much crowded at the time of our visit. As many of the Women who are brought here do little or no work, and by their presence are apt to excite the more tranquil patients, we suggest that the number should be reduced, and that the patients

occupying the new ward should be allowed to work in their own spacious day rooms.

“ We are glad to learn that a second assistant medical officer will shortly be appointed. A head nurse is much needed.

“ During our visit yesterday we personally examined every patient, viz. :—304 Males and 333 Females, and we inspected every part of the premises.

“ We heard few complaints, and we think that the general state of the Institution continues to be highly creditable to Mr. Holland and the other Officers.

(Signed)

“ W. G. CAMPBELL,

“ JAMES WILKES,

“ Commissioners in Lunacy.”

Although it would appear from the Treasurer's accounts that the average weekly cost per patient did not exceed 6s. 10½d., it amounted in reality to 7s. 3d. The difference is explained by a note at the foot of the accounts.

I have the honour to be, Gentlemen,

Your obedient humble servant,

J. HOLLAND, F.R.C.S.

Superintendent.
